February 2, 2023

Damage Prevention Community of Practice

PURPOSE

The Damage Prevention Community of Practice (CoP) has been established to *provide a venue for industry best practice Subject Matter Experts (SMEs) to convene, learn, share, and collaborate* in the support of *pipeline performance and continuous improvement* towards the *reduction of utility damage from external interference and increased public safety*.

MANDATE

- ✓ To promote opportunities for performance improvement amongst the CoP Company members, and to support continuous improvement of Canada's pipeline industry through commitment to safety and best practices.
- ✓ To collaborate and share experiences, lessons learned and best practices.
- ✓ To identify and collect Key Performance Indicators (KPIs), and to review and discuss effectiveness measures that assist in determining potential areas for industry improvement.
- ✓ To identify linkages and opportunities for collaborative strategic and/or technical initiatives, and to participate in the co ordination of those initiatives.
- ✓ To facilitate ongoing collaboration, interpretation of Regulations and information sharing with industry regulatory bodies.
